Imagination is the only Limitation

The revolutionary 21st century platform

Brane is one-stop destination for simplified,cumng-edge digital transformation througha unique solution framework basedon thegrammar of naturalspoken languages.The Brane platform collaborates directly with businesses to design customizableand highly compleK solutions wuhout the need townte a single lineof code.It enables the development of web and mobile solutions of any scale, empowering businesses with a wide range of features including efficient change management,securedeployment, scalableoperat ons.comprehensive data selVices. advanced searchcapabi ities.robust version control.andstrong authenticat on and authotization suppo<t. Additionally.Branesuppons multi-tenancy,seamless external APIintegrations,and aversat leversion control system.Al the heart of the platform is the Brane Operating System (BOS),a standardized solution environment that captures solution lo9ic andoperates atop the Technology Operating System (TOS). potentially creating mllionsof Brane Environment Templates (BETs).

Some **Visuals Creation for BRANE** the new Paradigm Framework

- Based on the principles of the Way World Works
- Multidisciplinary learning (60+ Subjects)
- Body of Knowledge that forms NSL framework

Enterprise Challenges

- Digital Transformation inhibited due to complexities of programming languages
- Absence of Value Creation practice

World's first Solution Generative Model

Enables creation of solutions

- In any spoken language (English, German, French, Spanish, Arabic, Hindi, Sanskrit and more)
- Several times superior, owing to native stacks like: Statistics (Real-time Analytics)
  - AI/ML
  - Blockchain
  - AR/VR
  - Best Practices
  - Clocks and many more
- Auto-generated hyper-personalized User Interfaces for Web and Mobile

Benefits

- Practically eliminates development time – build solutions in days and not years
- Solutions are transparent and searchable – Easy Change Management

NSL Practise

Converting an abstract Enterprise world into a Mechanistic Model

- Serves as the first framework to capture all aspects of Value Creation
- Eliminates discontinuities between Strategy and Operations
- Standardizes activities across all vantage points
- Generates 100x additional actionable information for every activity in the enterprise through horizontal switches between practices such as Accounting, Statistics, AI, ML etc.
- Delivers measurable gains – reduction in costs, enhancement in productivity
- Enterprise Control Tower akin to air-traffic control tower to monitor all enterprise operations
