

Advanced Industrial Water & **Wastewater Treatment Solutions**

Dorf Ketal Water Division delivers integrated water treatment solutions designed to optimize industrial performance, improve operational efficiency and support sustainable water management across industries. Combining decades of water treatment expertise with advanced specialty chemical technologies, we provide reliable and performance-driven solutions for complex industrial water systems

Our Solutions

Cooling Water Treatment

- Scale inhibition • Corrosion control • Microbiological control
- Closed loop & open recirculation systems
- Heat transfer efficiency enhancement

Boiler Water Treatment

- Oxygen scavengers • Condensate line protection
- Deposit prevention • Corrosion control
- Boiler efficiency enhancement

Water & Wastewater Treatment

- Coagulants & flocculants • Effluent treatment programs
- Water reuse & recycling solutions • Zero Liquid Discharge support
- Clarification & sludge management

Industries We Serve

RO & Membrane Solutions

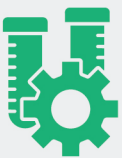

- Antiscalants
- Membrane cleaners
- Biocides
- RO & UF support chemicals
- Membrane performance optimization

Chemical Dosing & Automation Systems

- Automated dosing systems
- Monitoring & control systems
- Chlorine dioxide systems
- Modular dosing skids
- Customized dosing solutions

Why Dorf Ketal Water Division

Integrated chemical engineering solutions

Customized performance driven programs

Application focused technical expertise

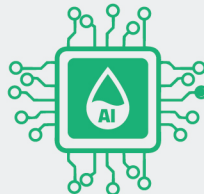

Sustainability & water reuse approach

Advanced industrial water management solutions

Global innovation backed by Dorf Ketal

Digitization of operating & performance data backed by AI engines for Maximizing water recycling & reliability
